

STUDY TOUR 2019 at **n|w**

Fachhochschule
Nordwestschweiz

Nov. 12th 2019 Fachhochschule Nordwestschweiz Campus Muttenz/CH

The new building offers from 2018 new space for training and further education of the five universities. So far the faculties spread over several locations. In the campus buildings school labs and office space are accommodated, which are flexible and therefore changing needs in teaching and research let adjust.

The university operates in the cutting edge of biology, medicine, natural and engineering sciences. Especially it is about the implementation and development of processes in the broadest sense of human health and sustainable production in the life sciences sector.

The laboratory concept has modern laboratory standards consistently implemented, based on an optimal functioning "open space laboratory layout".

The goal was to offer scientist and students of different disciplines located in different parts of the world - but have to work closely together – exchange views in an open, unrestricted and therefore contemporary working atmosphere. Often innovative advances in science occur due to spontaneous meetings and interactions of researchers of various disciplines.

The promotion of this idea was considered in the building concept.

High flexibility was as well the priority. The inclusion of the most modern Information technology allows teams from different locations in the world work together on the same project.

Schedule:

- 09:00 am Registration
- 09:45 am Welcome of Egbert Dittrich, EGNATON, ceo
- 10:00 am Welcome of NN, Fachhochschule Nordwestschweiz
- 10:15 am Presentation of David Leuthold, pool architekten
