

STUDY TOUR 2020 at

Baden-Württemberg

VERMÖGEN UND BAU
AMT MANNHEIM UND HEIDELBERG

march 10th 2020 University of Heidelberg

INF 275 – Ersatzbau Chemische Institute - ELKA
INF 344 – Center for Integrative Infections Disease Research - CIID
INF 225 – Center for Advanced Materials - CAM

One of Germany's largest Universities has almost completely moved to the Campus "im Neuenheimer Feld" far away from the historic location. We gratefully take the advantage to visit three different buildings finished between 2016 and 2018. The purpose of the functional buildings could not be more different. You can see a selection of university buildings, from chemical laboratories to animal facilities with safety areas. The tour shows challenges to design contemporary buildings on a site dominated by the architecture from the sixties.
